

ANJHON HULGUIN

JUNIOR FULL-STACK DEVELOPER

#1816 Saint Peter St., Marlane Subdivision, Minuyan, Norzagaray Bulacan | anjhon.hulguin02@gmail.com

SUMMARY

Ambitious IT graduate with hands-on experience building and deploying end-to-end web applications. Possesses a solid academic background in software principles combined with a proven ability to develop responsive front-end interfaces using React.js and integrate reliable back-end databases using Laravel, PostgreSQL, and Supabase. A proactive fast-learner committed to continuous self-study, ready to deliver secure, production-ready web solutions in a remote team environment.

PROFESSIONAL EXPERIENCE

Technical Support - Internship 2025 - 2026

Our Lady of Fatima University

- Engineered and deployed localized network infrastructures by laying down new high speed cables and implementing strict cable management standards to ensure organized, safe, and stable connectivity across multiple rooms.
- Optimized campus computer laboratory operations by performing routine system maintenance, software installations, and physical hardware upgrades on over 40 to 50 workstation units.
- Resolved diverse software bugs, hardware failures, and connectivity issues through methodical troubleshooting and root cause analysis, significantly reducing technical downtime for students and faculty.

PROJECTS

Scholarship Distribution System 2024 - 2025

- Configured and deployed a full-stack Laravel web application by setting up runtime dependencies using Composer and NPM, and linking local file storage.
- Optimized backend performance and local system environment compatibility by modifying PHP configurations, and troubleshooting core server extensions.
- Streamlined local server execution and deployment testing by developing automated .bat scripts, significantly reducing environment startup time for developers and testers.

Motorcycle Rental Web App 2025 - 2026

- Architected a full-stack motorcycle rental platform using React.js and Supabase to enable seamless, cross-platform vehicle browsing and real-time client booking.
- Engineered secure Supabase user authentication and PostgreSQL Row-Level Security (RLS) policies to ensure protected, isolated transactional sign-ups.
- Optimized frontend responsiveness through dynamic layouts and integrated real-time database syncing for precise downpayment and balance tracking.

TECHNICAL SKILLS

Web Development (Front-End): HTML5, CSS3, JavaScript (ES6), React.js
Database Management: MySQL, SQL, PostgreSQL, Supabase (Backend-as-a-service)
Technical Support & IT: Hardware & Software Troubleshooting, Network Configuration, Operating Systems (Windows/Linux), Technical Documentation
Other Tools & Core Concepts: Git/GitHub, System Maintenance, Customer Service, REST APIs, Row-Level Security (RLS), User Authentication

EDUCATION

Bachelor of Science in Information Technology 2020 - 2026

Our Lady of Fatima University
